Recent SAIT IT Program graduate aspiring to become a web designer and developer, eager to create solutions to make people's interactions with technology easier and more efficient.

Experience

SAIT, Calgary, Alberta
January 2018 – April 2021

Capstone Project Lead Product Designer

- Designed and developed a website application that identifies allergens in a menu item, focusing on front end development
- Delivered and executed user centered solutions for the product's design, functionality, and aesthetic
- Created design wireframes and prototypes, designed product logo, proposed and implemented ideas for usability and functionality
- Consulted with front and back-end teammates to identify ideal UI design for optimal user experience

Web Development Project

- Learned how to create a website from scratch using HTML
- Implemented CSS and JavaScript solutions to create a functional and aesthetically pleasing website

Client-Server Administration Project

- Implemented a network environment with 100+ users through VMWare Workstation
- Administered DNS, DHCP, FTP, Group Policies and Permissions, Active Directory, RDP and IIS, and environment security solutions.

Education

SAIT, Calgary, Alberta
